

27TH INFECTION AND SEPSIS SYMPOSIUM

6-8 JUNE '22

6

JUNE'22

08h30 - 09h00	CONFERENCE: Sepsis definitions: where do we go next?
09h00 - 10h00	Severe Infections. What is new in 2022? -Bacterial Infections. -Fungal disease. -Viral disease.
10h10 - 10h15	Opening ceremony
10h15 - 10h50	ROUND TABLE: Sepsis is not a disease! -Pro / con
10h50 - 11h20	COFFEE BREAK
11h20 - 12h50	ROUND TABLE: The crashing septic patient. -How do I support acute respiratory failure? -When do I start RRT? Should I use fluids and/or diuretics? -When do I start vasopressors and how do I choose them?
12h50 - 13h30	Satellite symposium 1
13h30 - 14h30	LUNCH
14h30 - 15h00	CONFERENCE: Is it time to review the SOFA score?
15h00 - 16h10	ROUND TABLE: Biomarkers. -Is there a role for biomarker combination? -New biomarkers for detecting and managing sepsis - a step towards personalized care? -Non-cultural diagnosis of invasive fungal infection: an update.
16h10 - 16h40	CONFERENCE: Bringing sepsis phenotypes to the bedside
16h40 - 17h10	COFFEE BREAK
17h10 - 18h30	ROUND TABLE: AI is coming! ... deal with it -Can AI accurately identify different phenotypes? -Is AI the key to effective TDM? -Ethical dilemma – Can AI accurately predict mortality?

27TH INFECTION AND SEPSIS SYMPOSIUM

6-8 JUNE '22

7

JUNE'22 Is it all about antibiotics?

08h30 - 09h40

ROUND TABLE:

Antibiotic Stewardship.

- What should we aim for? DDD? Preservation of some classes? Heterogeneity?
- Is all about communication: The difficult to approach doctor.
- How antibiotics harm patients.

09h40 - 10h10

CONFERENCE:

Beware the "one size fits all" philosophy regarding antibiotic timing and dose

10h10 - 11h20

ROUND TABLE:

Difficult-to-treat MOs.

- Epidemiology of Difficult to treat MOs
- New resistance mechanisms against new antibiotics.
- Dealing with PDR infections

11h20 - 11h50

COFFEE BREAK

11h50 - 13h00

ROUND TABLE:

How do I see sepsis therapy in 2030 years:

- Anti-infective Therapy.
- Organ support therapy.
- ICU design.

13h00 - 13h30

Satellite symposium 2

13h30 - 14h30

LUNCH

14h30 - 15h00

CONFERENCE:

Shortening the jump from bench to bedside. Putting clinical and basic investigation in sync.

15h00 - 16h10

ROUND TABLE:

Non-antibiotic strategies for management of sepsis and severe infections.

- Monoclonal antibodies against main pathogens.
- Extracorporeal removal of microorganisms / Toxins.
- Is there a role for phage therapy?

16h10 - 16h40

COFFEE BREAK

16h40 - 17h40

ROUND TABLE:

Upcoming options for the management of MDR Gram negative infection

- Cefiderocol.
- Eravacycline.
- New BL/BLI combinations.

17h40 - 18h50

Unmet needs in sepsis

- Rapid microbiological tests for sepsis. An update.
- Assessment and treatment of the microcirculation
- Biofilms

27TH INFECTION AND SEPSIS SYMPOSIUM

6-8 JUNE '22

8

JUNE '22

08h30 - 09h40

Extracorporeal support of sepsis

- Role of ECMO in refractory septic shock
- Optimizing antibiotic dose in CRRT and ECMO
- Is there a role for CO2 removal?

09h40 - 10h50

Targeted management of MODS

- Adrecizumab.
- Recombinant AP.
- Immune modulation.

10h50 - 11h20

COFFEE BREAK

11h20 - 11h40

Best Poster award (2)

11h40 - 12h50

Innovative Technologies in the ICU

- Metabolic monitoring: What should we aim for?
- Continuous hemodynamic monitoring.
- Wasting money or improving care?

12h50

The future of Infection and Sepsis
