- José Jurado (Brazil)
- Nestor Galindo (Spain)
- Washington Almeida (Brazil)
- Wolfgang Gubisch (Germany)

www.lusiadas.pt

Dear Colleagues,

The active involvement on the post-graduation development in Rhinoplasty, has been, for the past years, one of the goals of the ENT Department in Lusiadas Hospital, in Oporto. Therefore we will be organizing from 22th to 24th January 2015, the "NOSE 2015", displaying, this year, a slightly different structure. It will consist of a 3 days long theoretical-practical program devoted to Rhinoplasty, including 8 (eight) live surgeries, performed by all the faculty members, and some very specific conferences. The practical component will be very important as well, so we will continue this year with the Hands-on Cadaver Dissection in Rhinoplasty with fresh frozen specimens. The practical section of the course will have limited places. The venue for the dissection will be the Medical School ICBAS, not far away from our hospital. The success of the course is ensured by the well-known experience of our guests: Wolfgang Gubisch (Germany), Fazil Apaydin (Turkey), Nestor Galindo (Spain), José Jurado (Brazil), José António Patrocínio (Brazil) and Washington Almeida (Brazil). We will be honored to welcome you to the new Lusiadas Hospital.

António Sousa Vieira, MD
Oporto Lusiadas Hospital's ENT Director
